Project

Field(s)	Art in public space + society, community
Description	<p>Project developed in three phases:</p> <p>1: people from the municipalities or areas where the entities are located propose spaces to make an artistic intervention in public space (it would be done in parallel in the different participating countries. In our case in Rioja Alavesa);</p> <p>2: an open call would be made for artists to co-create with the community;</p> <p>3: choice of proposals and development of the selected one (they have to be collaborative and community proposals).</p> <p>The project would begin in September 2020 and last approximately two years.</p> <p>We will discuss with the partners the ways of interchange between countries.</p>
